DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

And;

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 and 5 ^{stand} ~~are~~ rejected under 35 U.S.C. 102(b) as being anticipated by US Pat No 5,857,889 issued to Abbot.

3. Abbott discloses an arc chamber of an ion implanter system (col. 5, lines 48-50).
4. Abbott discloses the walls of said arc chamber enclosure made of alumina (col.8, lines 13-19).
5. Abbott discloses said arc chamber enclosure (50) consisting of an electron emissive source (58) (col.6, lines 7-11).
6. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat No 6,413,387 issued to Shi et al.
7. Shi et al disclose an arc chamber for an electron emissive source (col.2, lines 64-67).
8. Shi et al disclose said source (12) extending into said arc chamber wall (col.11, lines 26-31; see fig. 5).
9. Shi et al disclose said wall of the arc chamber comprising an alumina insulator material (57) surrounding the source (12) (col.7, lines 31-38; see fig. 5).
10. Shi et al disclose a substantial portion of said wall through which said source extends into the arc chamber comprises said alumina insulator material (see fig. 5).

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
